VESPA VILLAGE / STREET VIEW CREATIVE DISTRICT:

Formerly the first planned industrial zone in Novi Sad,
And today an urban center of contemporary creativity,
The district is an area that has a turbulent past,
And decisive moments for the city.
It is in this space, which extends to 11,000 square meters,
That the testimony of past times meets the
Living pulse of creativity, replacing the long-forgotten
Sound of machines with new rhythms of artistic creation.

VESPA CAMP / STREET VIEW CITY BEACH - STRAND:

Placed on a bank of the Danube River. Strand as a city main

The park's monasteries stand out in its peaceful surroundings. They were built centuries ago and symbolize history and faith. Walking through these ancient buildings tells many tales. These sacred sites provide insight into Serbian spirituality and ancient traditions.

GUESTS of EVW 2025:

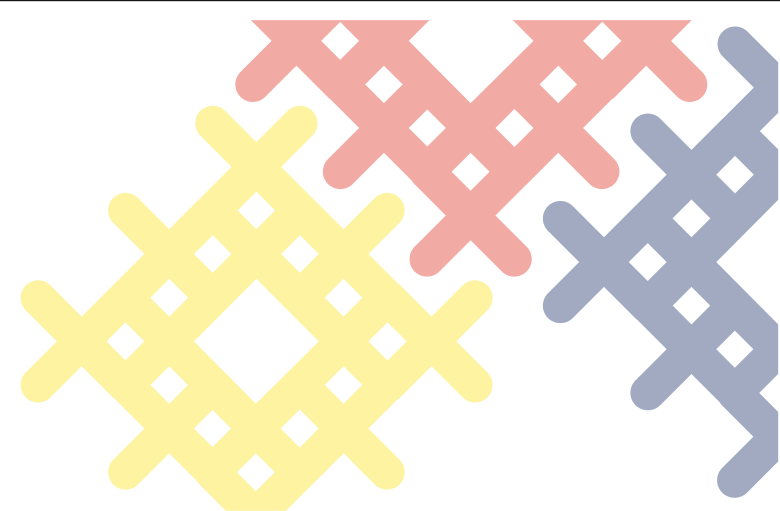

Because the Vespa community comes from various parts of society and people who are passionately connected to a certain time period of the 20th century through lifestyle, music and design.

So the Vespa community in Serbia has a brotherly relationship among friends with the Mini Morris Club of Serbia, to which we are connected through joint rides and actions.

There for the decision is to join us on Saturday for a ride around Novi Sad and be our guests in the Vespa Village.
